

INSTITUTE FOR ENVIRONMENT AND SUSTAINABILITY

Formally the Institute of Water Policy

POLICY DESIGN
CAPACITY BUILDING
FOR DURABLE AND EFFECTIVE OUTCOMES

FOUR THEMATIC AREAS

CLIMATE & ENERGY

SUSTAINABLE LIVELIHOODS

BIODIVERSITY & LAND USE

OCEANS & WATER

ABOUT US

The Lee Kuan Yew School of Public Policy's Institute for Environment and Sustainability (IES) is a network-nested university based sustainability think tank. IES bridges cutting-edge sustainability policy research with the creation of effective and durable policy solutions for Southeast Asia's critical environmental challenges.

APPROACH

World-class research is combined with training and dialogues to accelerate the generation and dissemination of knowledge critical for achieving "fit-for-purpose" sustainability goals championed by governments, the private sector, and civil society organisations.
