PHILIPS LAI

DIRECTOR, APAC GOVERNMENT AFFAIRS

Splunk

Philips is Director, APAC Government Affairs for Splunk. He is based in Singapore and works with government policies stakeholders across diverse markets in APAC & Japan.

Philips has more than 20 years of experience in government strategic business development in Cisco Systems & Sun Microsystems, R&D in Kent Ridge Digital Labs and general management in the Centre for Learning Technologies. He is passionate about creating new markets to drive long term revenue growth and technology leadership.

These new markets are built as a PPP model, in collaboration with Government, Industry and Citizens. These markets include National Cyber Security & Critical Information Infrastructure (CII), Smart Cities and Smart Grids, National Broadband Network, Students & Teachers workbench and various Java platforms.

In Kent Ridge Digital Labs and Centre for Learning Technologies, He was responsible for the research direction of the lab, managing a team of IT researchers and leading national IT pilots in schools. This work has led to a number of spin-off companies during the dotcom era.

Philips holds a Bachelors degree with highest distinction in Computer and Electrical Engineering from Purdue University, Indiana, USA. He is also a National Computer Board scholar and an Officer in Command in the Singapore Armed Forces.
