

## ROGER DO

CXO, FOUNDER

AutoPolitic (ANOVA Socialytics)

Roger runs AutoPolitic, a Data Intelligence firm focusing on social engineering for electoral outcomes and for translating ideological network into movements that result in legislative alteration. It has worked in many Asian countries and is currently winning 80% of all the campaigns it has worked on. The firm's client includes national and regional governments, political parties, candidates and international NGOs.

AutoPolitic is currently reverse-engineering 1) the creation of fringe belief circle and its propagation, 2) weaponization of social dissent, and 3) cross-border arbitrage of electoral outcome.
