VIVIAN PUN

AIR POLLUTION EPIDEMIOLOGIST, ENVIRONMENTAL HEALTH
Vital Strategies

Vivian Pun is an air pollution epidemiologist with over 8 years of research experience, focusing on air pollution, environmental health, urban health, methodological modelling, chronic diseases and well-being, and "big data" quantitative research methods. Vivian has hands-on public health experience, working as an epidemiologist and conducting disease and injuries surveillance for 3 years in the Massachusetts Department of Public Health in Boston, USA.

Vivian is responsible for making the case for addressing air pollution from a public health perspective, increasing commitment and capacity of key stakeholders to strengthen air quality management to promote public health, and informing the public about the risks of air pollution. She received her BS (Cellular Biology) from the University of Washington (Seattle, USA), MPH (Epidemiology and Biostatistics) from Boston University (Boston, USA), and PhD (Public Health) from the Chinese University of Hong Kong (HK).
