

HEXAGON

IPS Workshop on The Rise Of The Digital Economy and Business Transformation

30th June 2021

Jonathan Ng 黄文健

Director APAC – AEC 亚洲区域总监

Hexagon

Construction Industry Challenges

Insufficient planning & inaccurate estimating

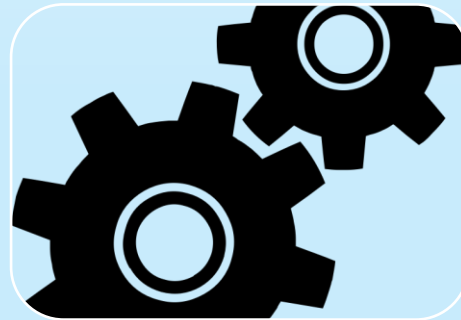

Poor project controls (cost & schedule)

Poor Communication

Design errors & omissions

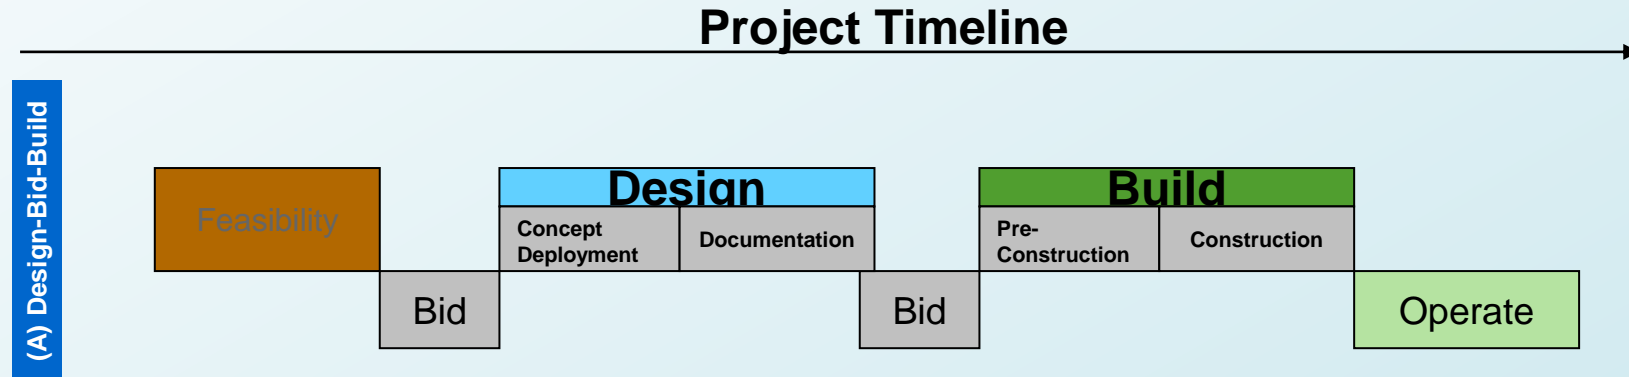

Poor Project Execution

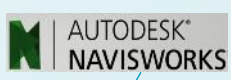

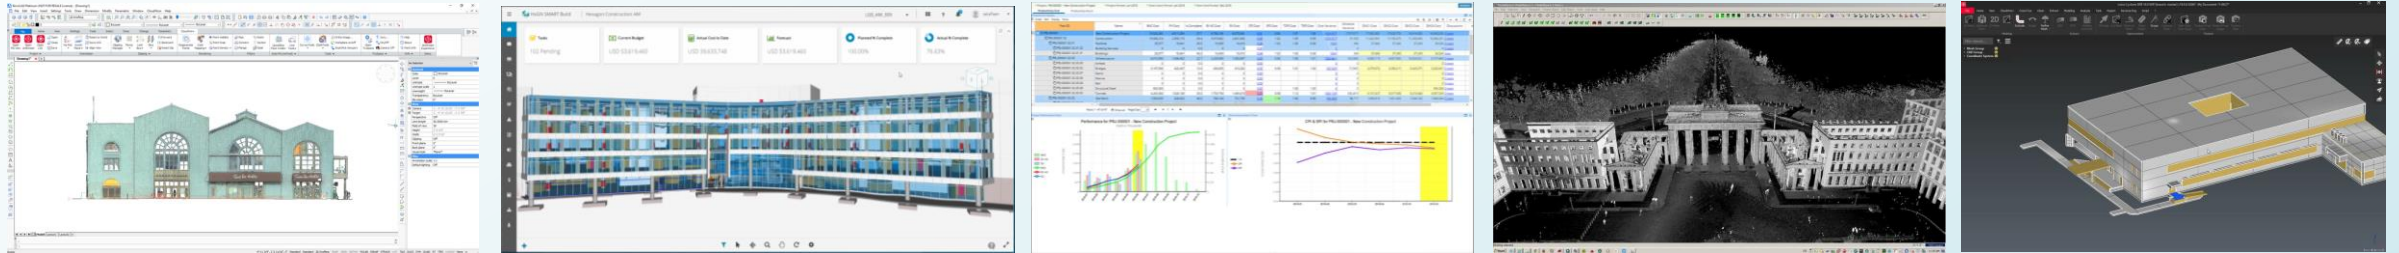

Shortage of Skilled Worker

Traditional Approach of Project Delivery

Typical System Architecture

Across the Asset Lifecycle for Construction Contractors and Owners

Capture Existing Conditions

Conceptual / Pre-Design / Detailed Design

Design Coordination & Visualization

Quantity Takeoff

Estimating / Scheduling

Budget & Bid Mgmt.

Design to Field & As-Built Verification

Field (Quality, Productivity Safety)

Project Mgmt. (RFIs, Submittals)

Cost (Budget, Changes, Contracts)

Closeout, Turnover, & Operations

Capital Planning

Resource Management

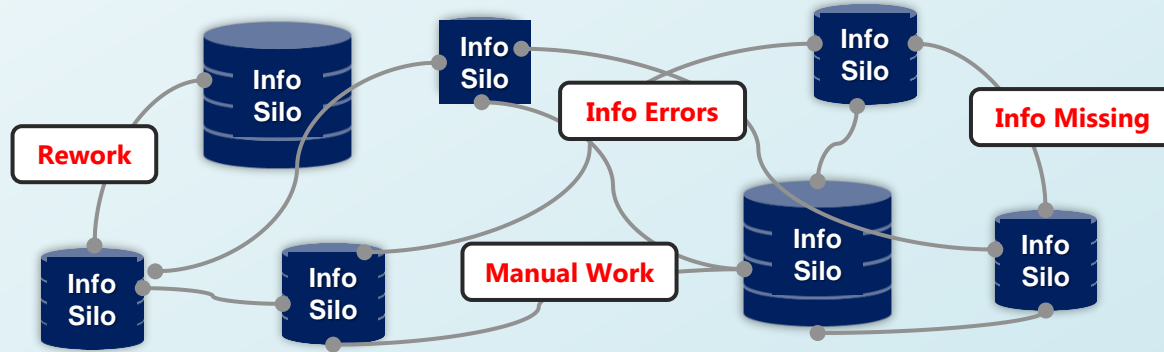

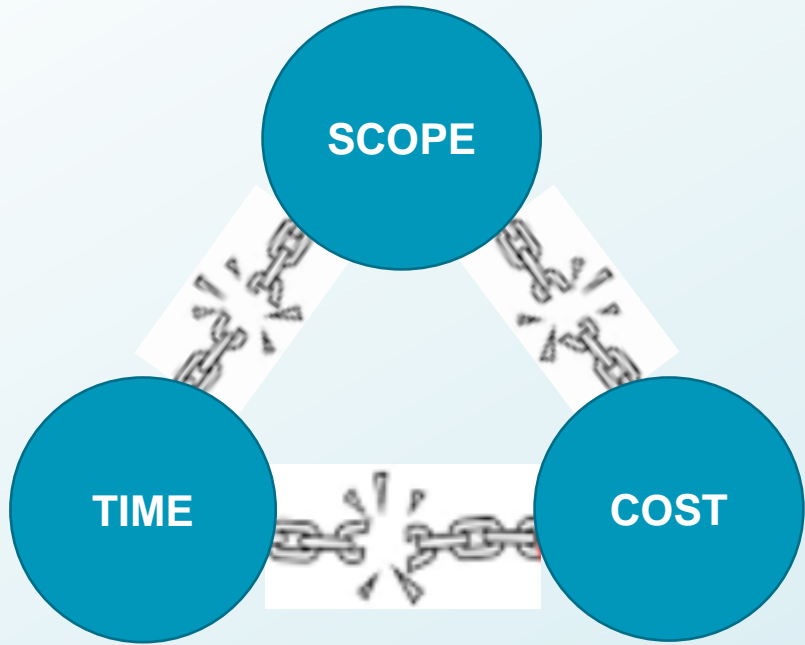

Cash Flow Mgmt.

Benchmarking

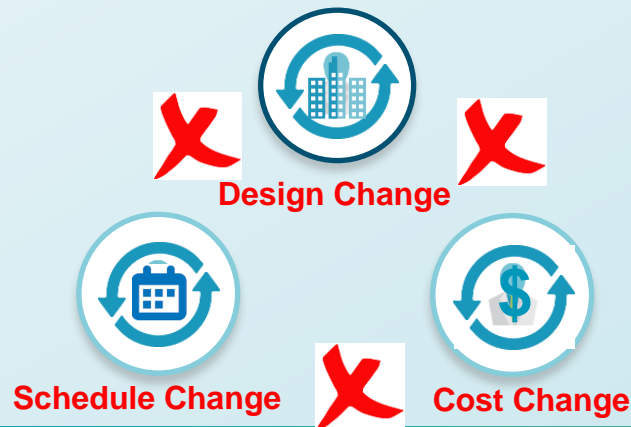

RISKS

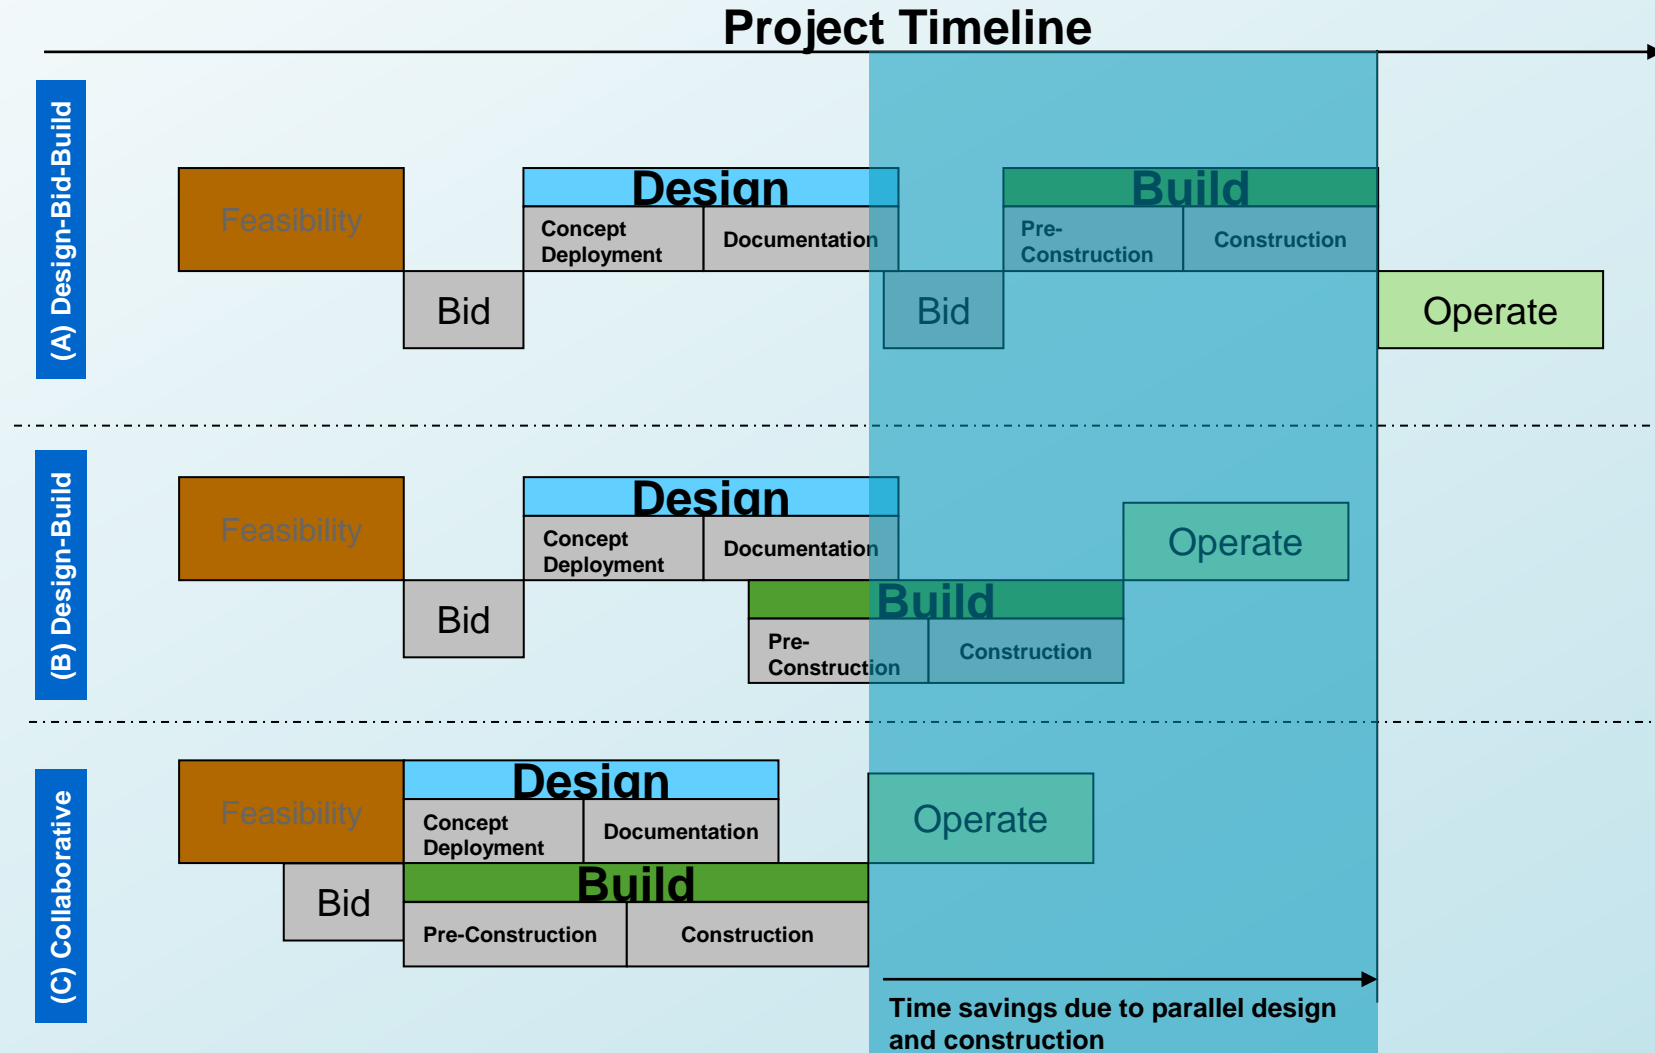

- Design/Scope, Time and Cost not linked/integrated, hence creating silos of information

- A lot of manual works required in calculating quantities/values, updating and analyzing data
- Changes not updated to other elements, hence creating inconsistency and outdated information

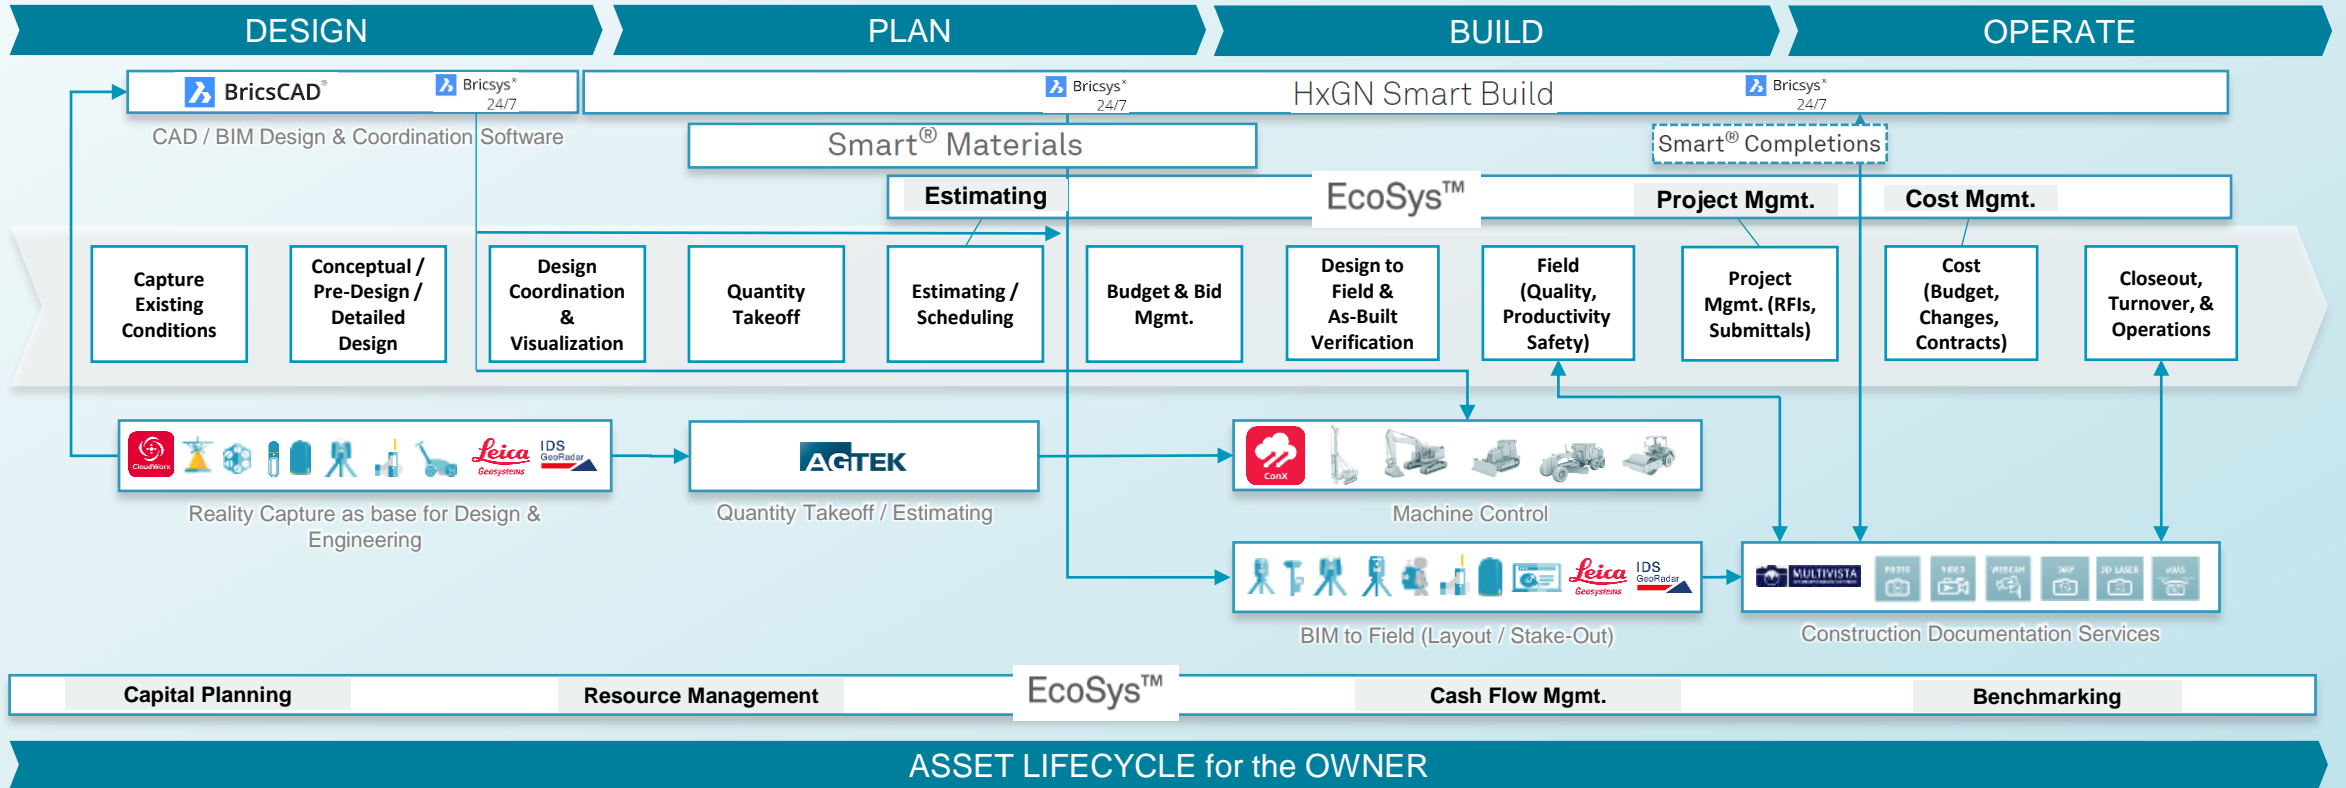

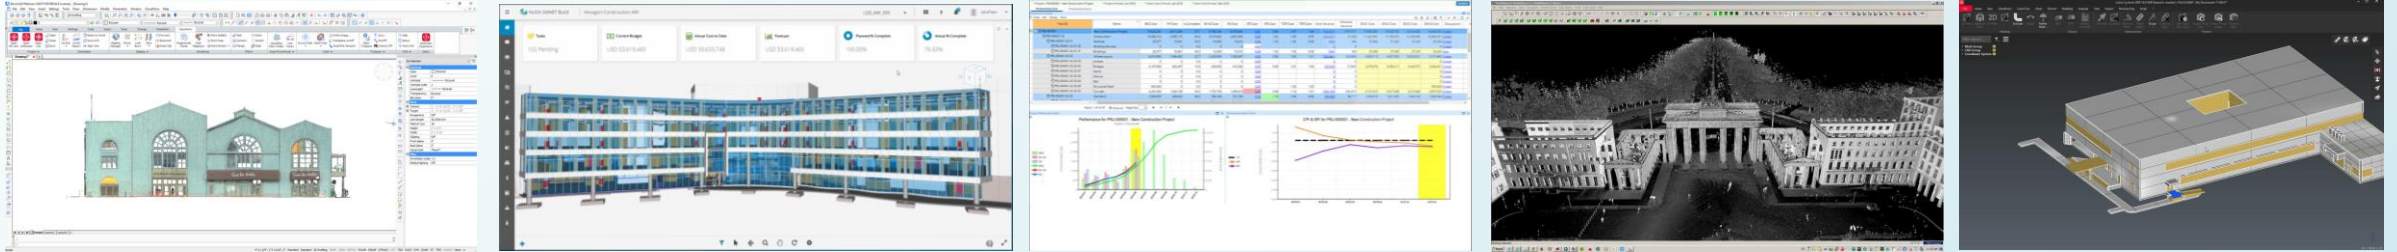

Tool also enables a more efficient process via parallel processing and upfront collaboration

Hexagon AEC Portfolio

Across the Asset Lifecycle for Construction Contractors and Owners

ASSET LIFECYCLE for the OWNER

The road to autonomy

Enabled by our unique set of core competencies

PHYSICAL WORLD

We digitally **CAPTURE** and **POSITION** the physical world

SENSOR SOLUTIONS
data capture

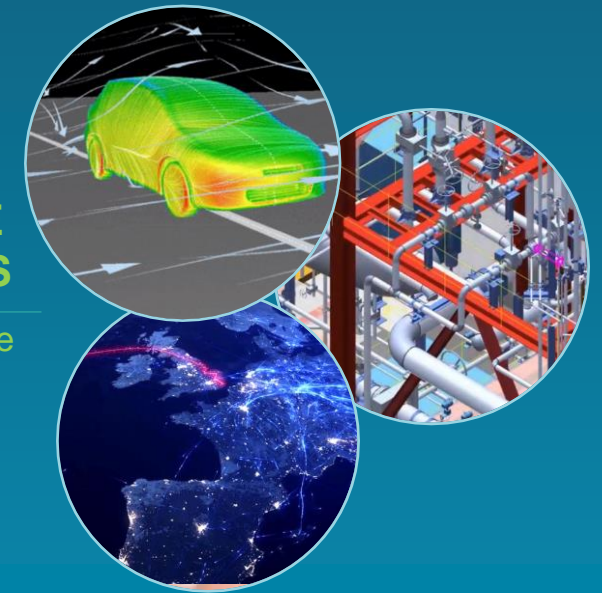

AUTONOMOUS SOLUTIONS
data leverage

We fuse the physical and digital worlds and leverage the power of algorithms to achieve **AUTONOMY**

SOFTWARE SOLUTIONS
data intelligence

DIGITAL WORLD

We digitally **DESIGN** assets, **SIMULATE** real-world scenarios, and deliver situation awareness with **LOCATION INTELLIGENCE**

Fast tracking innovation & digital transformation

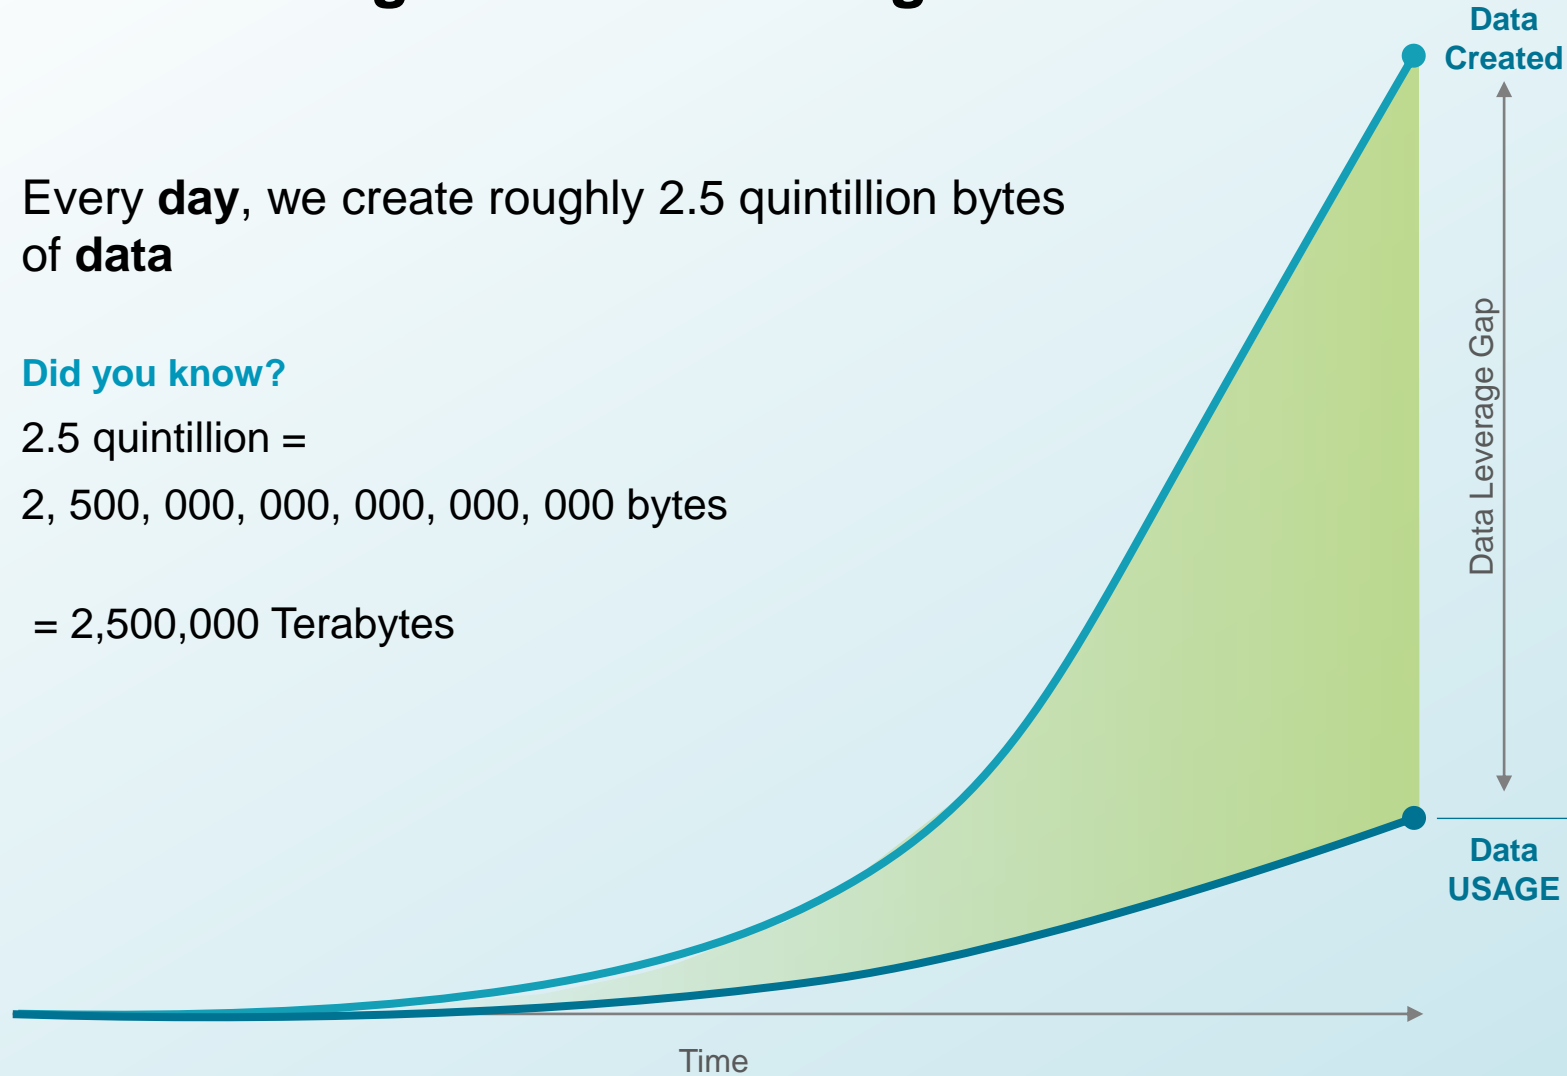

Every **day**, we create roughly 2.5 quintillion bytes of **data**

Did you know?

2.5 quintillion =

2, 500, 000, 000, 000, 000, 000 bytes

= 2,500,000 Terabytes

The **Data Leverage Gap** is where Hexagon innovation is focused.

Hexagon is a global leader in digital solutions that improve productivity and quality for manufacturing, infrastructure, safety and mobility applications. We create Smart Digital Realities™ that empower the future of autonomy across production and urban ecosystems.
