## SYNOPSIS

The Singapore Economic Roundtable (SER) is a biannual meeting of private sector economists, business leaders and policymakers. Participants gather to discuss and debate major macroeconomic policy issues facing the domestic economy, as well as a special session that seeks to focus debate on a specific contemporary topic of economic interest. The first session of the 40th SER will focus on macro-economic issues and their relation to Singapore, the region, and the world. This will be followed by a special session on supply chain reconfiguration in Asia and its implications for economic growth and regional stability.
