

**How NOT to build a  
platform for exchange and  
community building**

**Ownership**

**What if we could build a  
platform that could  
connect organisations with  
all IHLs?**

# The Challenge

- Collaboration with each IHL is separate
- Students assigned to same task regardless of major
- Easier to just work with the same IHL

# What if...?

- A platform for all Service-Learning offices
- Cut through the silos
- IHL work with community orgs more holistic
- Encourage collaboration on complex societal issues

# The Vision

- Collaboration between one or more com orgs with students and faculty from one or more IHLs
- A platform collectively owned by its users
- Scale

# The Possibilities

- Enables organisations to pitch individually or in groups
- Enables students to collaborate in groups and pitch ideas
- Institutional accounts for tracking and overview

# **Campus-Community Collaboration Platform for Skills-Based Service-Learning**
