Singtel Future Makers Social Innovation:

Leveraging DIGITAL to “bridge” basic needs like affordable education, health care and social services to the vulnerable and disadvantaged

Singtel
FUTURE
MAKERS

Helping social impact start-ups and entrepreneurs do the right things, by doing things right

- Need for holistic approach to the topic of “digital inclusion”.
- Certain segments like youth and children need multi-stakeholder approach involving the child, school, teachers and parents.
- Ignorance of “guardians” can contribute to the negative consequences.
- Lack of common standards and structure to the holistic topic of “digital intelligence” means efforts are fragmented and could be missing critical parts of the equation.
- Need for multi-sectoral approach and collaboration.
- Ability to measure the impact of the efforts.

It's about Touching Lives. Make a Difference.
