

ANTICIPATORY POLICY INNOVATION AND DECISION-MAKING

Co-create and develop new and better foresight practices and anticipatory planning processes within organisations

Institutionalise experimentation and strengthening anticipatory capabilities

Close the gap between foresight knowledge and policy-making

Short-sighted mindset tends to prevail in times of converging crises. Without an understanding of the future possibilities and long-term horizon and a visionary approach, action is diluted to reaction. Overly short-term and reactive approaches are specifically risky at a time when governments around the world are striving to become proactive and preemptive. The good news is that several approaches to anticipatory governance have already been developed. Join us to explore how the globally leading practitioners develop anticipatory governance and lead future-oriented policymaking.

This programme offers participants a truly unique opportunity to learn together with leading government foresight practitioners as we will bring together the accumulated international expertise from countries with both mature as well as emerging foresight ecosystems.

WHO SHOULD COME?

This programme is tailored for policymakers, government innovators and futures practitioners with a genuine interest in anticipatory governance, policy innovation and looking to improve their capacity to drive future-oriented policymaking. This training is for experts and executives looking to become more proactive, strategic and preemptive in their positions.

PROGRAMME OVERVIEW

(16 Nov) Module1 - How the Foresight System is Designed

- Anticipatory Governance
- Approaches to Anticipatory Systems

(18 Nov) Module2 - How is Foresight Integrated with Policy Process

- How might foresight be used in strategic planning
- Case study: anticipatory decision-making by using futures dialogues, panels and red teams
- Foresight and Experimentation

(23 Nov) Module3 - Interesting Trends in Foresight

- Identifying possibilities to expand anticipatory capabilities
- Sector-specific case studies

(25 Nov) Module4 - How to Move from Inspiration to Action

- How can anticipation be implemented and institutionalized
- Workshop: Developing ideas for experiments for institutionalizing anticipation

ABOUT THE PARTNERSHIP

**DEMOS
HELSINKI**

Demos Helsinki is a globally operating, non-profit, and independent think tank that conducts research, creates new policy tools, and helps build capacities to instigate and sustain essential transitions. We collaborate with local and national governments, international organisations, civil society, and companies to create the tools that will define this pivotal moment in global history. Built on the idea that only together can we fight for a fair, sustainable and joyful next era, Demos commits to leading societal transformation through our four areas of action – transformative governance, emancipatory economy, regenerative cities and infrastructure, and expanding agency in decarbonisation.
