

Climate Adaptation & International Disaster Management

Evaluate climate adaptation efforts, considering experiences with disasters, technological advancements

Analyze the impact of climate risks on infrastructure and real estate

Recognize the geopolitical implications of climate change & disasters

WIn today's world, the urgency of climate adaptation and disaster management has never been more evident. Climate change and the management of catastrophic events pose significant challenges to communities, economies, and ecosystems worldwide, with potentially devastating consequences if left unaddressed. This comprehensive program aims to equip participants with the knowledge, skills, and tools necessary to understand, evaluate, and address climate risks effectively.

Through a combination of lectures, case studies, interactive discussions, and practical exercises, this program will empower participants to effectively lead and advocate for climate adaptation and develop resilience in their respective fields and communities. Together, we can address the challenges of climate change and build a more sustainable and resilient future for all.

WHO SHOULD COME

- Government officials at national & regional level focused on public policy in the climate space
- Government officials responsible for programs that are used in funding climate adaptation programs

- Corporations who are highly vulnerable to climate disasters
- Companies in the climate adaptation space

WHAT YOU WILL GAIN

- Understand the urgency and necessity of climate adaptation, recognizing vulnerability to climate disasters & the potential physical and humanitarian consequences;
- Evaluate climate adaptation efforts, considering experiences with disasters, technological advancements, and government policies promoting adaptation;
- Analyze the impact of climate risks on infrastructure and real estate values, utilizing models such as the "climate alpha" model to inform public policy decisions;
- Assess the financial challenges associated with climate adaptation solutions and explore strategies to fund adaptation efforts;
- Recognize the geopolitical implications of climate change & disasters in the region, emphasizing the need for intergovernmental coordination to mitigate risks and foster resilience.
